

ALEKSANDAR RISTIC

FRONTEND DEVELOPER

PROFILE

Frontend Developer with 8 years of experience building secure, scalable SPAs in **React** and **TypeScript**. Skilled in performance optimization (~15% load time), component design (**Storybook**), and payment & authentication flows (**Stripe**). Passionate about creating reliable, high-trust user experiences.

WORK EXPERIENCE

Freelancing

2024 - present

- Developed modern, responsive **WordPress** websites using **Elementor**, focusing on visually appealing design and seamless user experience.

Development D.O.O.

2022 - 2023

Frontend developer - remote

- Develop frontend part for **Craft CMS** in **twig** template
- Build custom solutions in **Javascript**, **Tailwind**, and **PostCSS**,
- Build custom components and parts for UI with **Storybook** in **JavaScript**, **HTML** and **CSS**, which leads to **20% faster page implementation**
- Ensured **accessibility compliance (WCAG)** and responsive UX across device

Riddle & Code

July 2022 - October 2022

React developer - remote

- Work on a website for crypto trading, in **React**, **Typescript**, **Tailwind**, and **React-query** to enhance the website's UI library which reduced page load time by **15% through optimized React component rendering**
- Create custom features and components with **Storybook**, **React** and **TypeScript**
- Used **ESLint/Prettier** to maintain consistent code style across projects

Quantox Technology D.O.O. / Celsius

February 2022 - Jun 2022

React developer - remote

- Collaborated with 8 frontend engineers to build a high-performance website using **React** and **TypeScript**, increasing component **reusability by 10% and improving developer onboarding** through detailed documentation.
- Developed new website features with **Storybook** and **TypeScript**, wrote **unit tests (Jest)** to maintain code quality, and efficiently fixed bugs during testing cycles.
- Implemented **RESTful API integrations** to fetch and render dynamic data, ensuring smooth and responsive user interactions. Adhered to modern frontend best practices and contributed to building a scalable and maintainable architecture
- Optimized React component **rendering and reduced load times by 10%**

Software nation D.O.O.

2015 - 2022

Frontend developer / React developer - in-house

- Mentored 2 junior devs to build a car insurance website using **React**, **React Context**, and **Material UI**. Designed stepped user data collection flows, coordinated with a backend engineer, and implemented secure **Stripe payment** integration, improving delivery speed by 15%
- Created **WordPress** website with a custom theme with **ACF plugin** from Adobe Illustrator using **Bootstrap 3**, which improved **Lighthouse** performance score from **65 to 95 by optimizing images, code-splitting, and reducing render-blocking resources**
- Transfer page from **jQuery UI** to **React** application for Osram

PROJECTS

Zomont D.O.O.

Zomont is a interior furnishing company, project built with **Wordpress**, **Bootstrap** and **ACF page builder**

<https://zomont.rs/>

X/O Game

Simple XO game, project built with **React**, **Typescript** and **TailwindCSS**
